Govind Rana

Software Engineer | Bangalore / Hyderabad , India

+91 8839216772 | s.govindrana@gmail.com | sgovindrana

EDUCATION

Galgotias University — *Noida, India*

B.Tech in Computer Science, Specialization in Cloud computing | 7.84 CGPA — *May 2015 - May 2019*

SKILLS

Languages: Core Java (Java 8/17/21), Python, TypeScript, JavaScript, HTML5, CSS3

Frameworks/Database/Tools: OOP, Data structures, Design Patterns, Spring MVC, Spring Boot, Angular 16, REST APIs, Microservices, JPA/Hibernate, SQL, NoSQL(MongoDB), Docker, Kubernetes, AWS (EKS on EC2, S3, IAM, RDS, Lambda), JUnit 5, XML|JSON, AGILE (SCRUM), JIRA, CI/CD (Jenkins, ArgoCD), SonarQube, Gen AI, Git

WORK EXPERIENCE

CGI — *Hyderabad, India*

Software Engineer | Java Full Stack Developer — *Nov 2025 - Present*

- Developed and enhanced a vulnerability remediation automation **JEDI product** using **Java 17, Spring Boot** and **Angular**.
- Built **REST APIs** and automated remediation workflows, reducing manual effort to fix security vulnerabilities.
- Worked with the AI team on a **RAG pipeline** for the **JEDI** product, owning the **data ingestion** module in **Python**.
- Integrated **third-party payment gateway** using **REST APIs**, implementing payment initiation and transaction tracking.

Cresen Solutions — *Remote, India/USA*

Software Engineer | Java Full Stack Developer — *Oct 2024 - Jan 2025*

- Developed **SpendMate**, a **financial** tracking product, using **Java 17, Spring Boot, Angular 16** and **PostgreSQL**.
- **Led** 2 UAT cycles with the US team and conducted peer **code reviews** for two **feature enhancements**.

Career Break

UPSC Preparation — *Aug 2021 - Oct 2024*

Cognizant Technology Pvt. Ltd. — *Bengaluru, India*

Jr. Software Engineer | Java Full Stack Developer — *Jul 2019 - Aug 2021*

- Worked as Java Full Stack Developer for **American International Group's (AIG) RetireUp project, Insurance domain.**
- Developed **REST APIs** and **microservices** using **Java 8, Spring Boot, Angular** and Hibernate, deployed on **AWS**.
- **Collaborated** with **cross-functional** teams, applying DevSecOps practices with tools like Veracode, ThreadFix, and WhiteHat to remove vulnerabilities in legacy **JSP** applications and modern Microservices, enhancing application security.
- Optimized Document Management System performance using **multi-threading**, significantly improving response time.

PERSONAL PROJECTS

1. Food Delivery Application — *GitHub (Source Code / Screenshots)*

Java Full Stack Application : — *Feb 2025 - July 2025*

- Built a Java Full-Stack cloud-native food delivery system from scratch using **Java 17(Spring Boot), Angular 16, AWS.**
- Implemented **Microservices** architecture with **REST APIs** and **CI/CD** pipelines using **Jenkins, ArgoCD, Docker, Kubernetes.**
- Integrated **MySQL** (AWS RDS), **MongoDB** (Atlas, MongoCompass) for relational and NoSQL storage, deployed on **AWS EC2.**
- Wrote **JUnit test cases**, integrated them into the **Jenkins** pipeline for automated testing, enforced code quality using **SonarQube**

2. Medicare — *GitHub*

Java Full Stack Application :

- Built a Medicare Management System using **Java, Spring Boot, Angular, REST APIs**, JPA/Hibernate, TypeScript and MySQL with Git version control; implemented modules for Admin, Doctor, and Patient management using a microservices architecture.

3. CRUD Java Full Stack : Java, Spring Boot, Angular, Rest API, etc. — *GitHub*

4. Mentor-on-demand Java Full stack : Java, Spring Boot, Angular, Rest API, etc. — *GitHub*

CERTIFICATES

- **Master Spring Boot Microservice Angular Kubernetes(K8s) CICD AWS - 2025** — **Link to Certificate**
- **Full Stack Engineer Program 2020 — IIHT, Cognizant Academy, Bengaluru** — **Link to Certificate**
